## India's First Multi Linguistic Scholarship Platform

Every year, thousands of deserving students drop out of the formal education system in India. Lack of financial resources is one of the main reasons for this fallout.

Several scholarships, funded by Government, organizations, institutions and individuals are available in India. However, a majority of these scholarships remain unutilized. This lag, in the scholarship ecosystem, is mainly attributed to limited awareness among students and lack of application support.

Adding to this, it has been observed that the information regarding application process of most of the scholarships is available only in English, which leaves out a large ambit of deserving students.

Vodafone India Foundation has established Learning with Vodafone platform to help Indian students by providing easy-to-comprehend information in seven Indian regional languages.
